Maribyrnong
CITY COUNCIL

FINANCIAL PLAN

2025–35

CONTENTS

Acknowledgement of Country

Council is proud to represent a municipality filled with important and significant Aboriginal history. It acknowledges the Traditional Custodians of this land, the Kulin Nation, and acknowledges the rich culture and considerable contributions Aboriginal and Torres Strait Islander Peoples have made and continue to make to this City.

1. LEGISLATIVE REQUIREMENTS

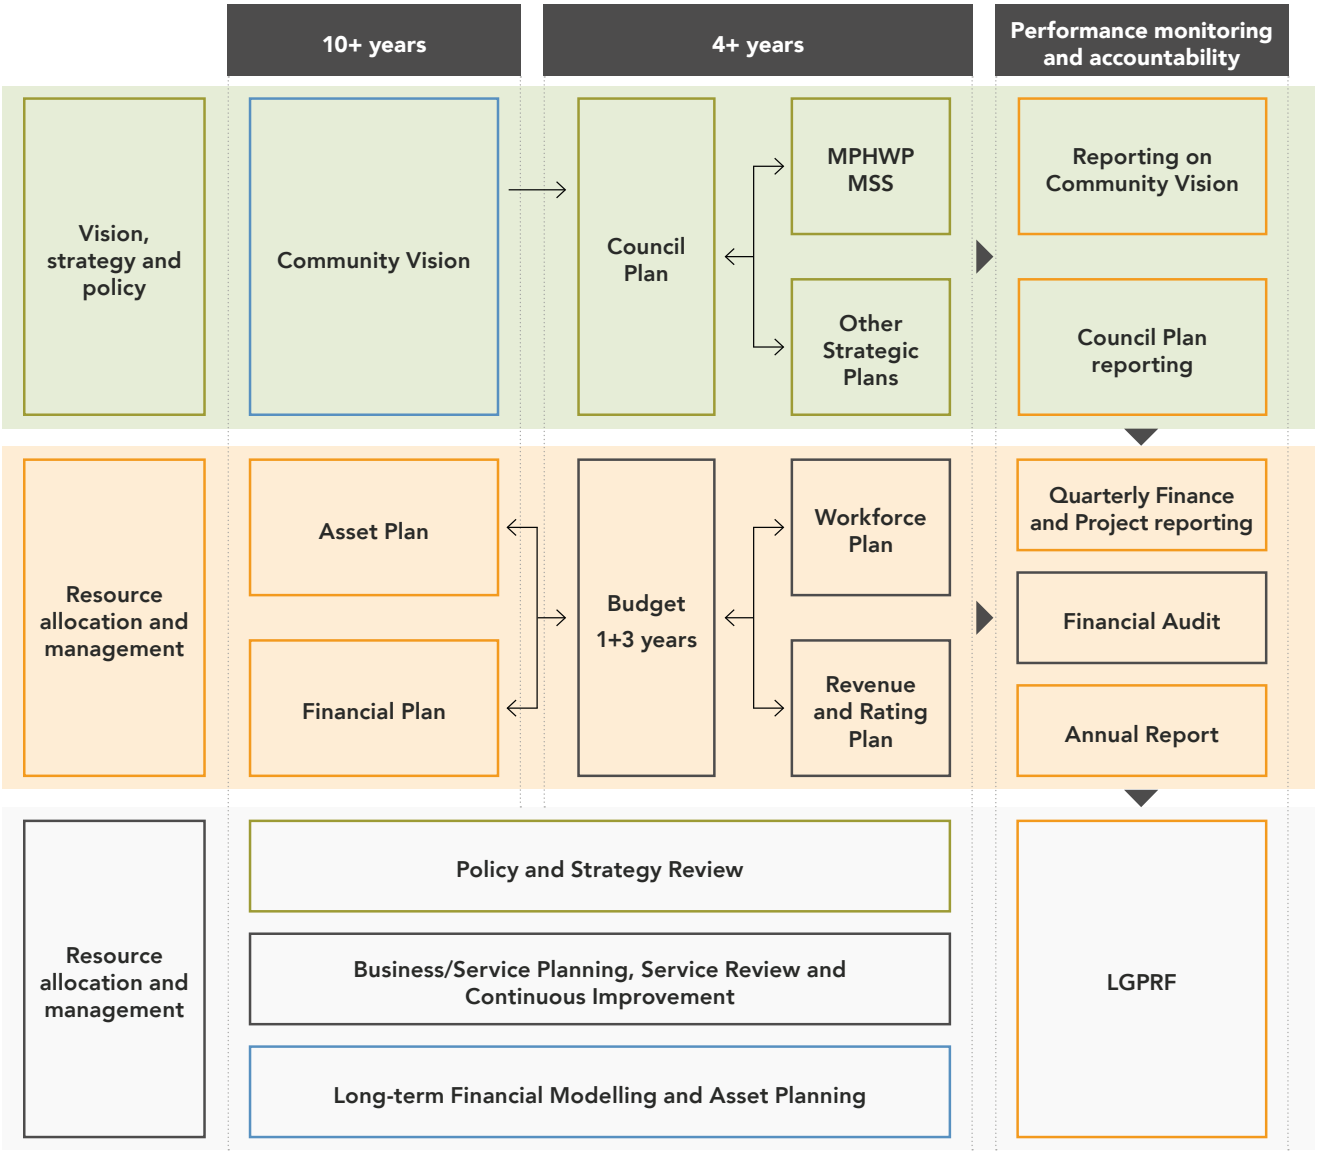
This section describes how the Financial Plan links to the achievement of the Community Vision and the Council Plan within the Integrated Strategic Planning & Reporting framework. This framework guides the Council in identifying community needs and aspirations over the long term (Community Vision), medium term (Council Plan) and short term (Annual Budget) and then holding itself accountable (Annual Report).

The following diagram provides an overview of the core legislated elements of an integrated strategic planning and reporting framework and outcomes.

Mural by **James Price**, photographed by **Nicole Reed**.

Overview	Outlook	Elements		Outcomes
A community vision reflects a consensus view of the future community wants and needs, and the high level actions required to achieve desired outcomes. Vision statements reflect shared values and aspirations and create active tension between the current and desired future state.	10 year +	**Community Vision** >10 year aspiration for the community		There is a consensus view of the desired future (10+ years) for the community and potential pathway to achieve this. Intended directions, pathways and investments have legitimacy. Council jurisdiction and targets for advocacy are understood. This is an understanding of community, civil society and broader partnerships required to achieve the Vision.
A Financial Plan is used by Council, community and the organisation to ensure the long-term viability and sustainability of the Council. It supports the achievement of the Community Vision and establishes investment and spending thresholds. The Asset Plan ensures effective management and stewardship of community assets.		**Financial Plan** 10-year financial framework to support achievement of Community Vision and Council Plan	**Asset Plan** 10-year asset management framework to support achievement of Community Vision and Council Plan	Improved understanding of Council's capability to achieve it vision. Clear view of the fiscal capacity and constraints of Council. Financial risk and potential areas of volatility are managed. Council Plan, strategies, programs and projects can be resourced. Council is a trusted and responsible stewards and community assets meet future community needs.
Council Plan outlines the agenda for a new Council and supports the achievements of the Community Vision through Strategic objectives and strategies. Revenue and Rating Plan outlines a medium-term view of how Council will raise revenue to supports activities and achievement of Council Plan strategies and objectives.	4 year +	**Council Plan** 4-year plan to support achievement of Community Vision Strategic objectives, major initiatives, strategies and indicators	**Revenue and Rating Plan** 4-year plan to support achievement of Community Vision and Council Plan	Council owns the Council Plan and the community is clear on its strategic objectives will be achieved and consistency with available resources. There is alignment with and progress towards the Community Vision. It is clear how Council will collect revenue to support activities.
Council will develop and adopt a budget each year that describes in more detail the way in which revenue will be raised and expenditure directed. The budget must include 3-year financial projections as well as description of services, major initiatives and performance measures. The CEO must prepare and maintain a 4-year Workforce Plan.		**Annual Budget** 1+3-year budget supporting Council Plan delivery, includes description of services, major initiatives and performance measures	**Workforce Plan** 4-year plan reflecting organisational structure and staffing requirements to support delivery of Council Plan [s.46(4)]	Strategies and initiatives to achieve Council Plan are clearly articulated, mapped and resourced. Programs and initiatives have quality and cost standards. Resources (including people) required to deliver on commitments are understood. The community has had an opportunity for deliberative engagement.
The Council is accountable for its performance through the Annual Report, Local Government Performance Reporting Framework and mandatory quarterly financial reports that are presented to Council. Many Councils develop and maintain additional mechanisms to ensure public accountability, these include: quarterly and Council Plan initiatives, routine reporting on project, program and policy initiatives.	1 year +	**Annual Report** Report on operations including implementation of Council Plan and major initiatives Service performance indicators Financial performance statement	**LGPRF** Local Government Performance Reporting Framework	Transparent monitoring of finanical, service and program performance. Improved accountability to Council and communicty or achievement of objectives. Imporivement opportunities captured and incorporated into planning.

The following figure demonstrates how each element might inform or be informed by other parts of the integrated framework.



1.1. Strategic planning principles

The Financial Plan provides a 10 year financially sustainable projection regarding how the actions of the Council Plan may be funded to achieve the Community Vision. The Financial Plan is developed in the context of the following strategic planning principles:

a) Council has an integrated approach to planning, monitoring and performance reporting.

b) Council financial plan addresses the Community Vision by funding the aspirations of the Council Plan. The Council Plan aspirations and actions are formulated in the context of the Community Vision.

c) The Financial Plan statements articulate the 10-year financial resources necessary to implement the goals and aspirations of the Council Plan to achieve the Community Vision.

d) Council's strategic planning principles identify and address the risks to effective implementation of the Financial Plan. The financial risks are included at section 1.2.2 below.

e) The Financial Plan provides for the strategic planning principles of progress monitoring of progress and reviews to identify and adapt to changing circumstances.

1.2. Financial management principles

The Financial Plan demonstrates the following financial management principles:

1.2.1 Revenue, expenses, assets, liabilities, investments and financial transactions are managed in accordance with Council's financial policies and strategic plans.

1.2.2 Management of the following financial risks:

a) the financial viability of the Council (refer to section 2.1 Financial Policy Statements).

b) the management of current and future liabilities of the Council. The estimated 10 year-liabilities are disclosed in section 3.2 Balance Sheet projections.

1.2.3 Financial policies and strategic plans are designed to provide financial stability and predictability to the community.

1.2.4 Council maintains accounts and records that explain its financial operations and financial position (refer section 3 Financial Statements)

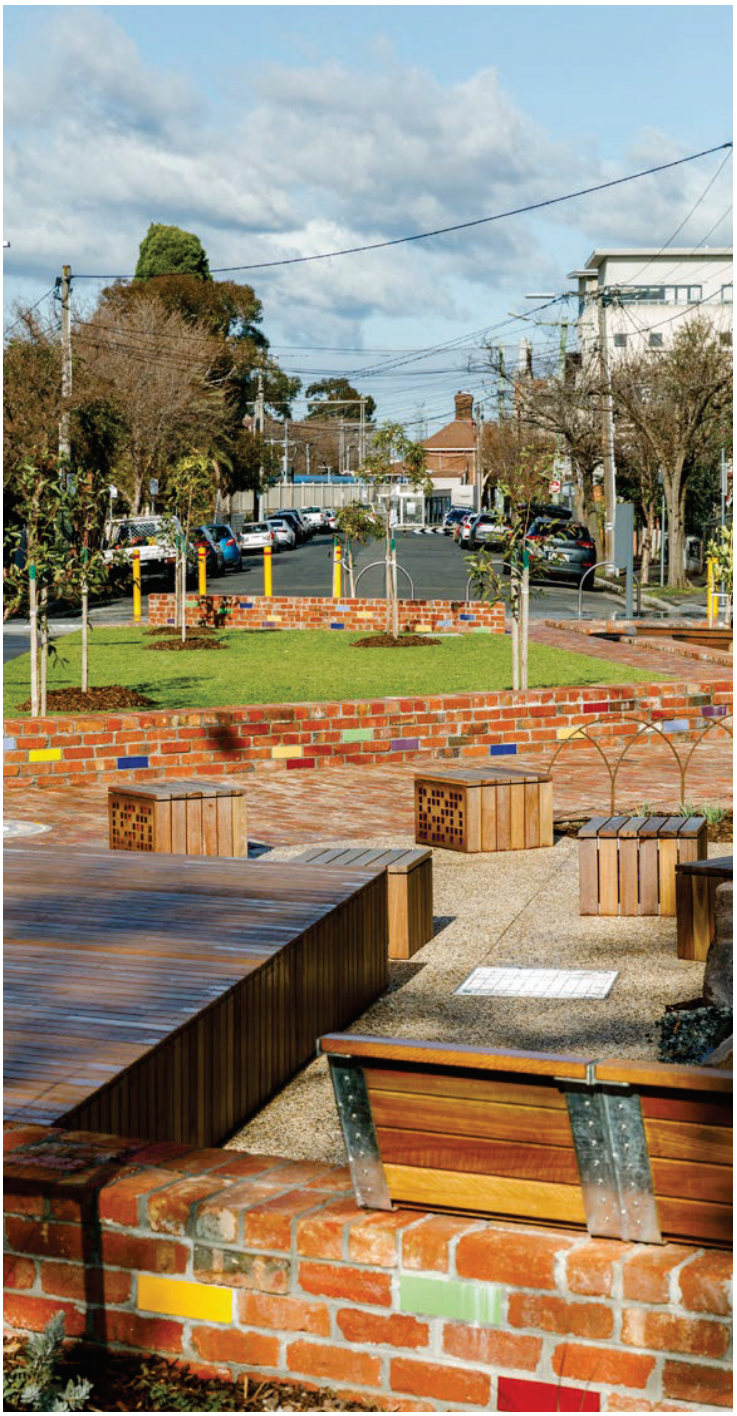


Photo by **Gianna Rizzo**

1.3. Engagement principles

Under Section 91 of The Local Government Act 2020 Council must develop, adopt and keep in force a Financial Plan in accordance with its deliberative engagement practices as outlined in its Engagement Policy.

Community engagement

Since July 2024, we have been conversing with our community across two engagement phases on key areas they would like us to focus on as part of engagement on the Community Vision, Council, Asset and Financial Plans. This included a deliberative survey in late 2024, to replicate as much as practicable the conversations of the Panel, recognising the different methodology where respondents were presented with introductory information prior to commenting on one or more sections:

- Services and Programs
- Assets
- Managing Growth
- Changing Climate
- Their vision for the future.

During this time we engaged with around 2,500 residents, who provided 700 comments online or at in-person opportunities, and through a deliberative engagement process. The key findings from these conversations are detailed below.

- Support for maintaining or improving the service offering currently delivered.
- Support for infrastructure (both physical and social) that keeps pace with our growing population.
- A willingness to accept higher up-front costs for more sustainable outcomes and cost savings in the future.
- A love of libraries and community centres as places that build community connection.
- A desire for more open green space and trees.
- Care and concern for vulnerable people in the community – affordable housing, foodbanks, free or low cost opportunities for life-long learning or events.
- Requires for improved amenity – from repairing footpaths and roads, through to more public toilets.
- Opportunities for communications and engagement to share the programs and services on offer throughout the City.

We also provided a budget assessment tool for ratepayers to provide input into 'balancing revenue with expenditure" which we are again rolling out as part of the Financial Plan engagement to support a deliberative conversation. This involved sharing information during the first phase of community engagement to provide "fund it" results identify the services most important over the next ten years.

1.4. Deliberative engagement workshops

- The Foundations for Tomorrow workshops brought together 15 community representatives (from an initial pool of 33) recruited by Council through an Expression of Interest process promoted on Your City Your Voice (Council's online engagement portal), email call outs, posters in libraries and community centres, social media and requests to Council Advisory Committees.
- The Foundations Panel deliberated on some of the most pressing and complex issues impacting Council for their planning now and into the future.
- A range of deliberation techniques were used throughout the workshops, including presentations and panel discussions from a range of leading subject matter experts from within Council. Topics included the range of Council services and programs, climate change, population growth, asset management and financial planning.

1.5. Service performance principles

Council services are designed to target to community needs and provide value for money outcomes for residents. The service performance principles are listed below:

a) Services are provided in an equitable manner and are responsive to the diverse needs of the community. The Council Plan is designed to identify the key services and projects to be delivered to the community. The Financial Plan provides the mechanism to demonstrate how the service aspirations within the Council Plan may be funded.

b) Services are accessible to the relevant users within the community.

c) Council provides quality services that provide value for money to the community. The Local Government Performance Reporting Framework (LGPRF) is designed to communicate Council's performance regarding the provision of quality and efficient services.

d) Council is developing a performance monitoring framework to continuously improve its service delivery standards.

e) Council is developing a service delivery framework that considers and responds to community feedback and complaints regards service provision.

1.6. Asset Plan integration

Integration to the Asset Plan is a key principle of the Council's strategic financial planning principles. The purpose of this integration is designed to ensure that future funding is allocated in a manner that supports service delivery in terms of the plans and the effective management of Council's assets into the future.

The Asset Plan identifies the operational and strategic practices which will ensure that Council manages assets across their life cycle in a financially sustainable manner. The Asset Plan, and associated asset management policies, provide Council with a sound base to understand the risk associated with managing its assets for the community's benefit.

The Asset Plan is designed to inform the Financial Plan by identifying the amount of capital renewal, backlog and maintenance funding that is required over the life of each asset category.

The level of funding will incorporate knowledge of asset condition, the risk assessment issues as well as the impact of reviewing and setting intervention and service levels for each asset class.

In addition to identifying the operational and strategic practices that ensure that Council manages assets across their life cycle in a financially sustainable manner, the Asset Plan quantifies the asset portfolio and the financial implications of those practices. Together the Financial Plan and Asset Plan seek to balance projected investment requirements against projected budgets.

The capital expenditure assumptions (including new assets, renewals, disposals, depreciation etc.) are an input item to the model. These are based on the Council's City Infrastructure Plan. These assumptions are underpinned by key financial objectives including maintenance of existing service levels, 27.48 per cent of Rates and municipal charge be dedicated to capital and asset improvements.

2. FINANCIAL PLAN CONTEXT

This section describes the context and external / internal environment and consideration in determining the financial plan projections and assumptions.

Our challenges and opportunities

While many of the challenges we face are similar to those of other Victorian Councils, we are presented with some unique ones. The following are some of our most significant challenges and opportunities.

Tackling climate change and its impact on our environment, economy and people

Climate change is one of the greatest challenges of our time. We already see its effects. There are more warm spells, frequent and intense downpours and longer fire seasons. It's impacting our biodiversity, water supplies, energy demand, and our health (particularly that of our more vulnerable community members). As outlined in our Climate Emergency Strategy and Action Plan and in Zero Waste Strategy 2030, we recognise that every action our community and Council takes influences our environment. We want to make that influence as positive as possible. How we adapt and mitigate climate change impacts will require a holistic approach, from how we drive sustainable development to how we grow our local industries.

We want to continue supporting this and strengthening our financial and community resilience for the next challenge or natural disaster.

Many small and medium businesses across a diverse range of industry sectors are vulnerable as they typically do not have the cash reserves to prop up declining revenues. Whilst the current cost of living crisis continues to evolve, some have been forced to reduce staff and many face the risk of closure. The reduction in in house hold budgets has flow on impacts to households and local communities.

Meeting the changing needs and expectations of a growing and diverse community

The City of Maribyrnong is changing and growing. This section summarises the current status and the changes that are expected to occur over the next 10 years and beyond.

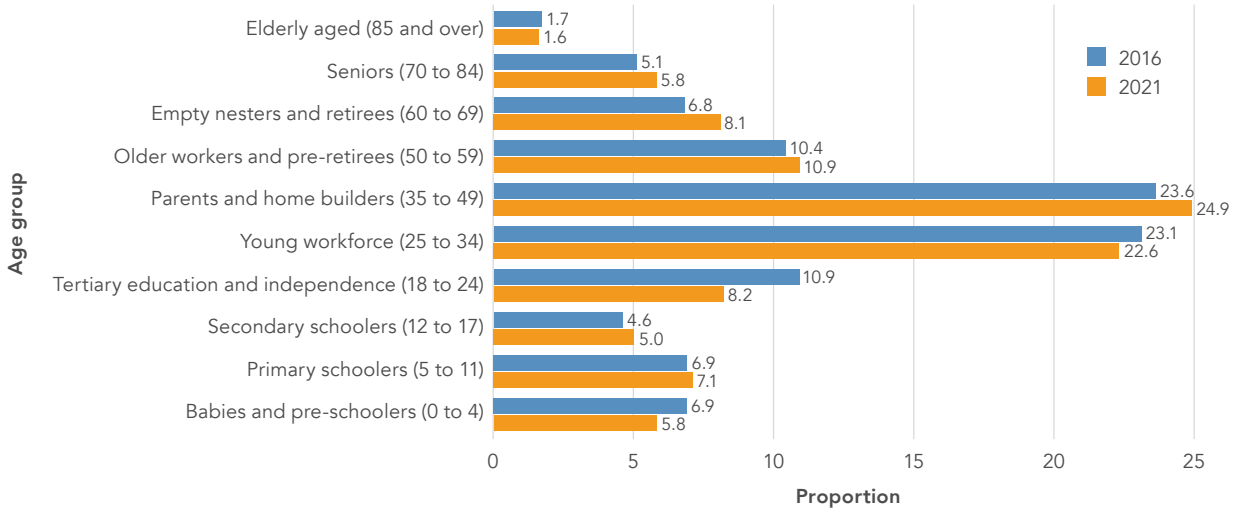
Photo by **Bakri Mahmoud**

Population: age groups

The estimated resident population of the City of Maribyrnong was 91,762 people in 2023 (according to the Australia Bureau of Statistics). This was an increase of 2,300 people over the five year period to 2023 (representing an average annual growth rate of 0.6%). The low average annual growth rate was due to a 3.4% decline in the city's population during the COVID-19 pandemic in 2020–21.

The age structure of the population in 2016 and 2021 is shown in the chart below. The chart shows an increase in the proportion of residents who were parents and homebuilders (35–49 years), older workers (50–59 years), empty nesters and retirees (60–69 years), and seniors aged (70–84 years).

Age structure 2015 and 2021

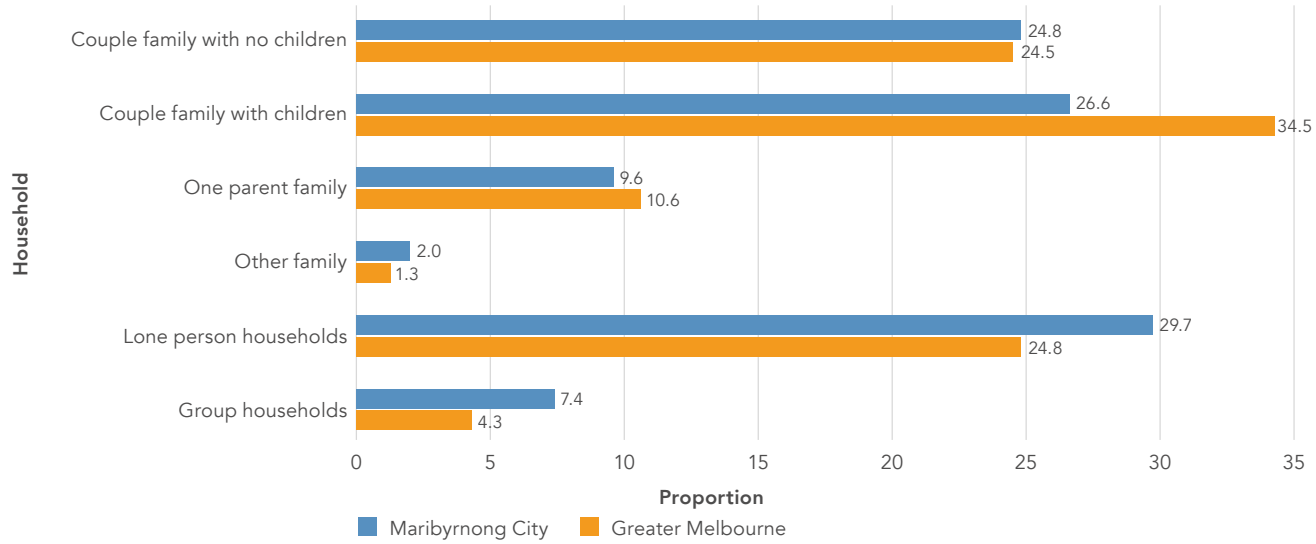


Source: ABS

Household structure

The City had lower proportions of families with children and higher proportions of lone person and group households compared to Greater Melbourne in 2021. The household structure of the population is shown in the chart below.

Household type, 2021

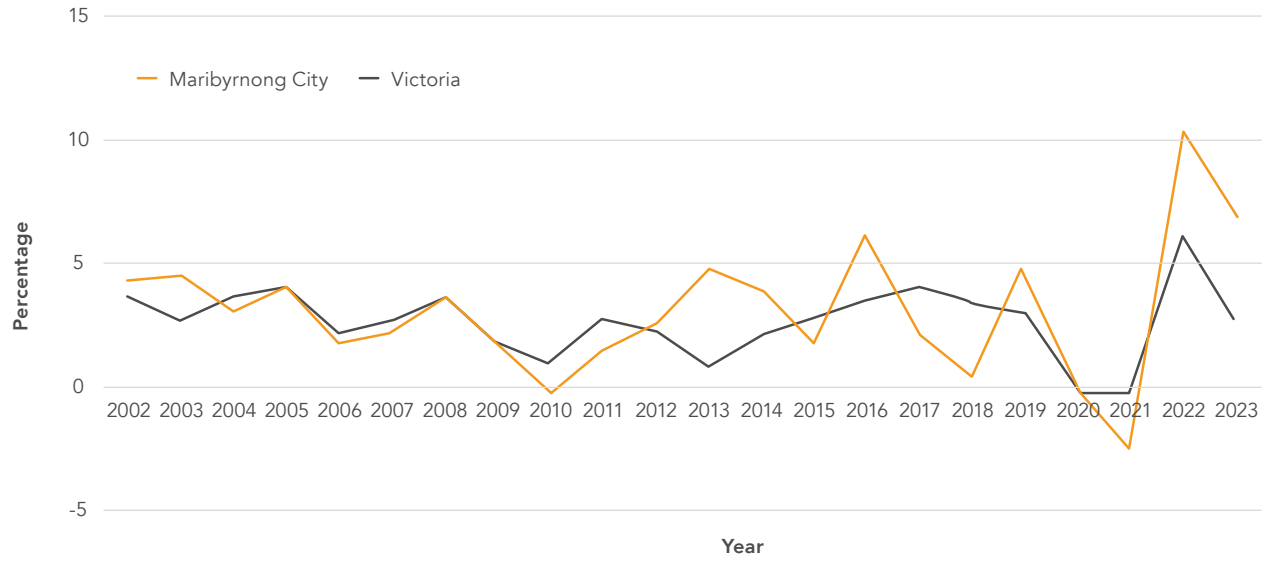


Source: ABS

Employment and jobs
The City's gross regional product was estimated at almost 7.25 billion in the year ended June 2023. Gross regional product is an estimate of the wealth generated in a region.

In the City of Maribyrnong, gross regional product has been variable but growing in the last decade (as shown in the chart below).

Percentage change in gross regional product compared to previous year



Source: .id, 2025

There were an estimated 51,800 jobs and 9,100 active businesses (registered for GST) based in the City of Maribyrnong in 2023. Key employment industries were health care and social assistance and retail trade, while the key industries by number of businesses were transport, postal and warehousing businesses; professional, scientific and technical services businesses; and construction businesses.

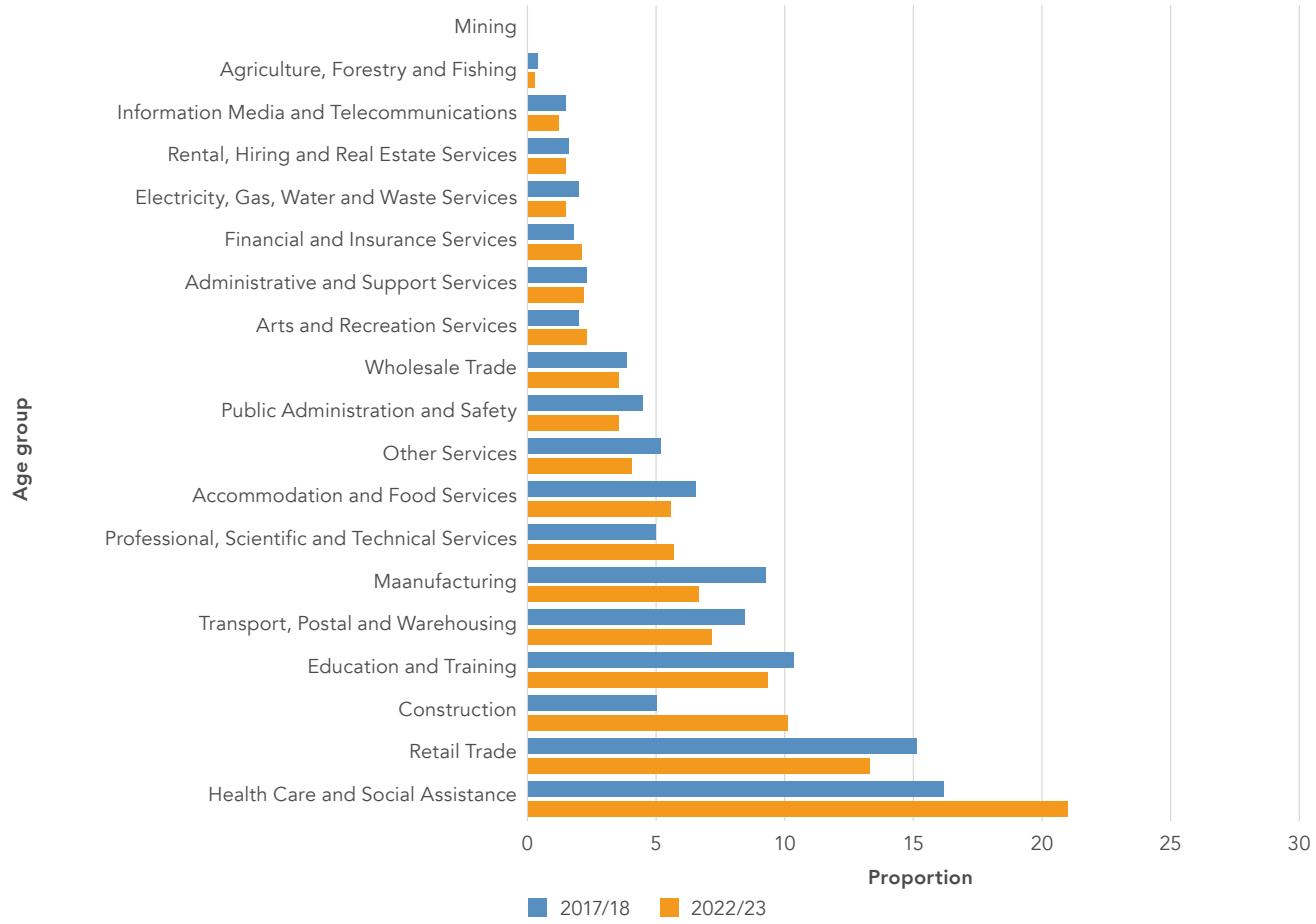
The City's economy is in transition from an economy focused on production to one focused on services. The number of manufacturing jobs has reduced in response to changes in technology and competition from lower cost producers overseas.

The proportion of service sector jobs has been increasing, with demand growing for a range of services. Employment in many residential related industries, such as retail trade; accommodation and food services; and health, are growing. Employment in knowledge intensive services are also increasing, such as those in the professional services, science and creative industries. As this transition continues, manufacturers in the City of Maribyrnong are adapting to these new conditions with a shift to high value–adding, knowledge-intensive manufacturing. The transition of the local economy is illustrated in the employment profile chart shown below. The city is also undergoing a construction boom, with the resulting increase in employment in the construction sector.

The chart shows that the health care and social assistance industry was the largest employer in 2022/23, followed closely by the retail trade and construction industries.

Employment in these industries is growing, with an additional 4,700 jobs created between 2017/18 and 2022/23.

Full-time equivalent employment by industry sector 2017/18 and 2022/23



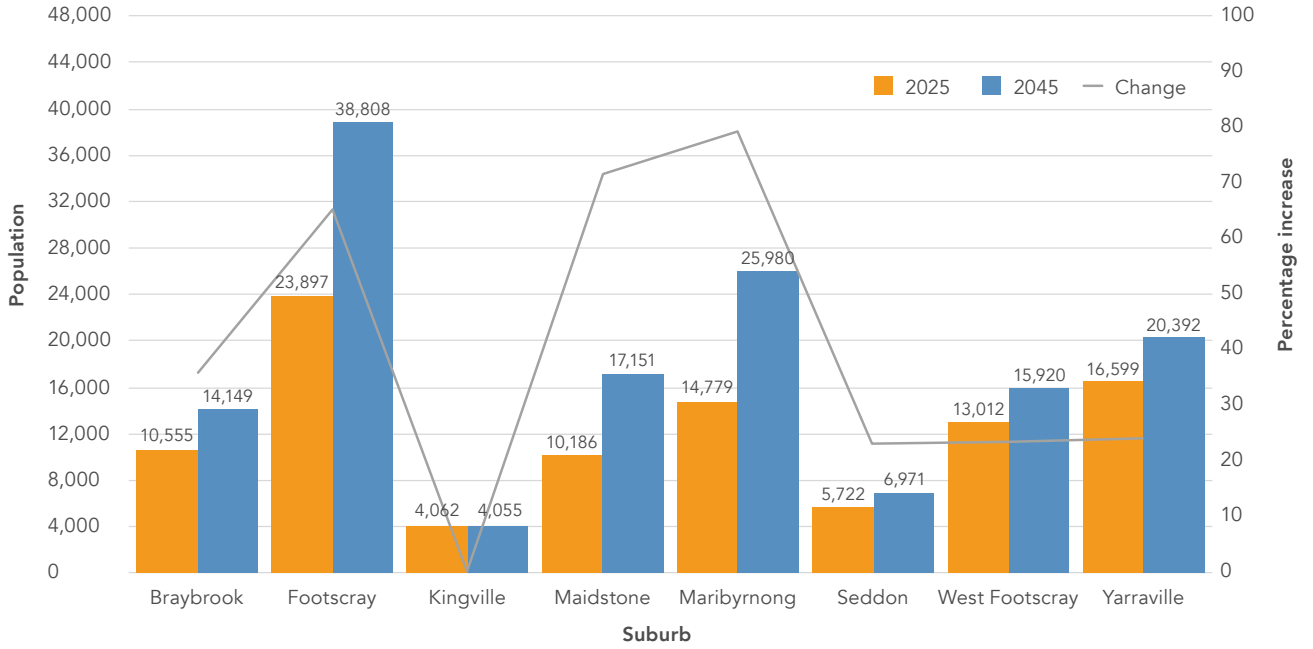
Source: .id, 2025

Future growth forecasts: population

The City's population at June 2025 was forecast to be around 100,800 residents, and is expected to grow by around 44% to 145,500 residents at 2045. This is a forecast increase of around 44,600 residents over this 20 year period, representing an average annual growth rate of 1.8%. These forecasts were developed in January 2023 and were based on the growth and development trends and expected development at that time. Forecast population growth is concentrated in Footscray. Footscray is expected to grow by almost 15,000 residents from 2025 to 2045 (a 62% increase and representing an average annual growth rate of 2.5%).

Forecast population growth by suburb is shown in the chart below from 2025 to 2045.

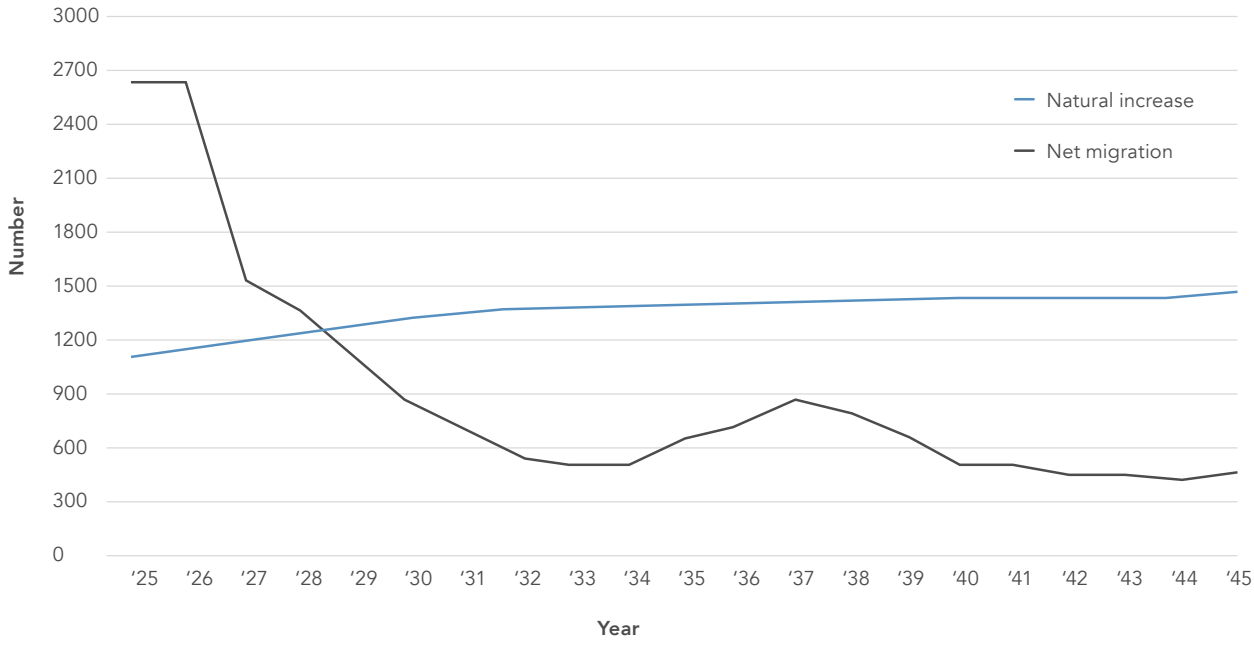
Forecast population 2025–2045



Source: .id, 2025

The forecast increase in population is made up of two components – natural increase in population (which is the net change in population based on births and deaths of residents), and net migration (which is the net change in population based on residents moving into and out of the municipality). Net migration is expected to decrease over time and temporarily increase from 2034–40.

Annual components of population change 2025–45

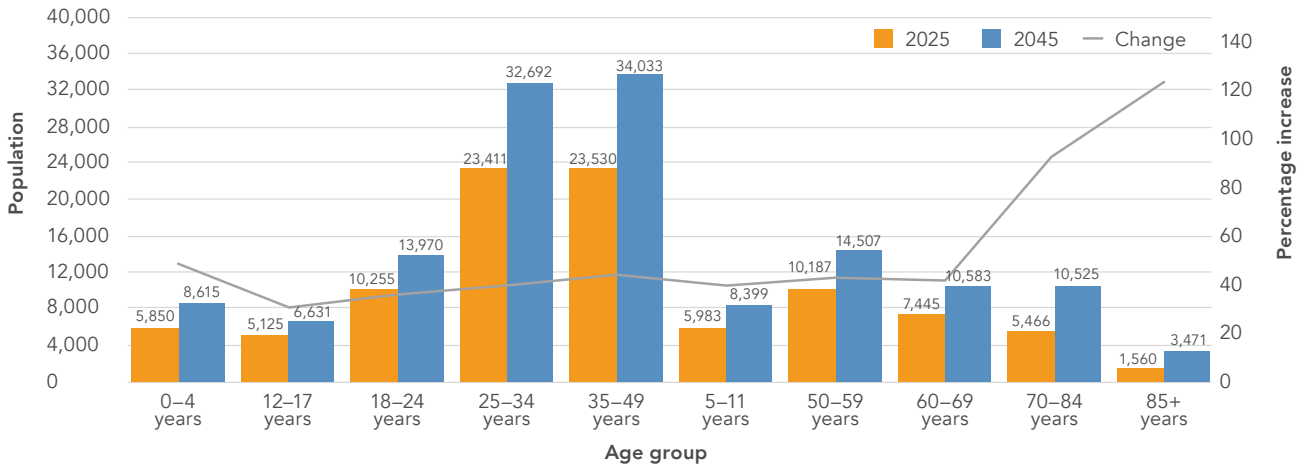


Source: .id, 2025

The ageing of the City of Maribyrnong population is forecast to continue with large increases in the proportion of older residents. The number of residents 65 years of age and older is expected to increase from around 14,500 residents in 2025 to around 24,600 residents in 2045, an increase of around 10,100 residents. However, the numbers of residents in all age groups increase, and there is expected to be a strong increase in the number of young adults as well.

The number of residents aged 20 to 34 years is expected to increase from around 23,400 residents to 32,700 residents, an increase of around 9,300 residents. The chart below shows the projected future population by age group.

Forecast population 2025 and 2045



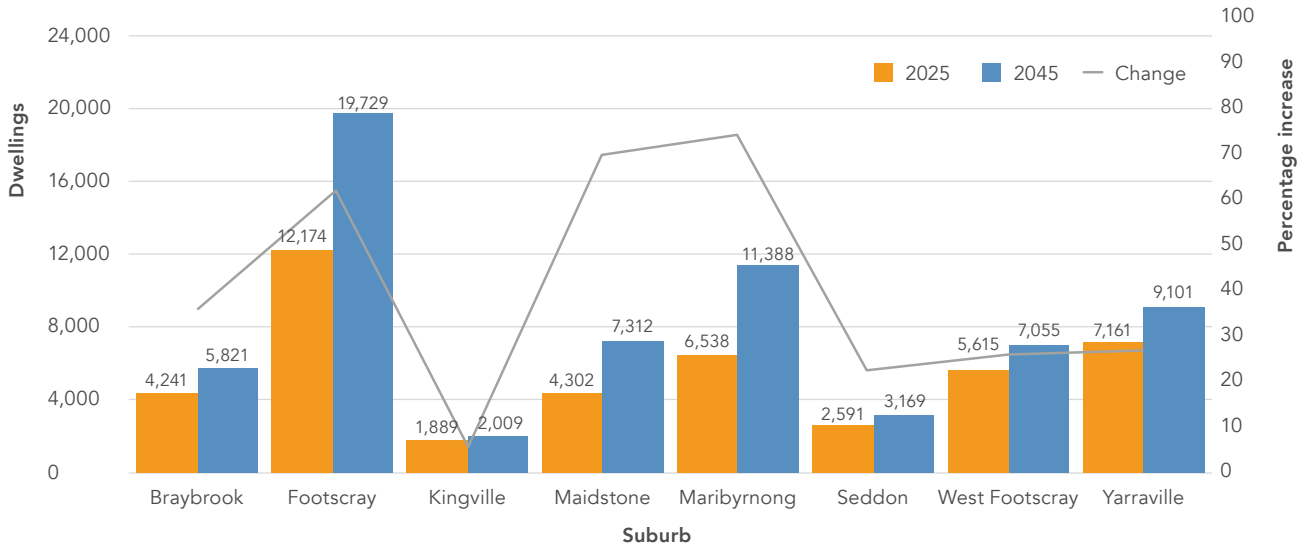
Source: .id, 2025

Future growth forecasts: dwellings

The total number of occupied and unoccupied dwellings in the City of Maribyrnong at June 2025 was forecast to be around 44,500 dwellings, and is expected to grow by around 47% to almost 65,600 dwellings at 2045. This is a forecast increase of around 21,100 dwellings over this 20 year period, representing an average annual growth rate of 2.0%.

The forecast growth in dwellings is concentrated in Footscray. An additional 7,500 dwellings are expected in Footscray between 2025 and 2045 (a 62% increase and representing an annual average growth of 2.4%). Forecast dwellings by suburb are shown in the chart below from 2025 to 2045.

Forecast dwellings 2025 and 2045



Source: .id, 2025

Developing a prosperous local economy that is the right fit for maribyrnong city council

Strong growth is forecast in Footscray and Highpoint activity centres. These areas will continue to change quite significantly to include higher density development. The Braybrook Regeneration project will result in higher population growth in Braybrook than would otherwise be the case. Large development areas such as Defence Site Maribyrnong will add significant additional population over the longer term. Infill development will increase development activity and population throughout the suburbs of the City.

Community Vision

A sustainable, vibrant city where history is acknowledged, differences are respected, and diverse communities are supported to connect and thrive.

Health and wellbeing

To promote and protect health and wellbeing at a population level, actions in this Council Plan look to help improve daily living conditions and support equal access and opportunity to live well.

Council has considered health and wellbeing matters as part of a stand-alone Municipal Public Health and Wellbeing Plan. This Plan has been developed through engagement with the community and key stakeholders.

In addition to the links with the Council Plan strategic objectives, specific health and wellbeing actions identified in the Health and Wellbeing Plan are guided by four strategic priorities for the next four years:

- A healthy and active community: A city that supports active living, access to nutritious food, and equitable healthcare services for all.
- A resilient and thriving community: A city that strengthens mental wellbeing, social connections, and access to support services for all.
- A sustainable and liveable city: A city that prioritises climate resilience, green spaces, and a clean, safe environment for all.
- An inclusive and connected community: A city that values diversity and culture, encourages participation, and supports a sense of belonging for all.

Through the alignment of objectives with the Council Plan 2025–29, the Health and Wellbeing Plan embeds health considerations into Council operations, aiming to build the internal capacity of Council to address health and wellbeing priorities in a coordinated manner. This approach maximises the effectiveness of Council's public health initiatives, ensuring a structured and coordinated response to local challenges and priorities.

Strategy objectives

To achieve the community's vision, Council has focused on five strategic objectives over the span of the Council Plan 2025–29.

As the breadth and depth of Council's work is extensive, each strategic objective also reflects other plans, strategies and yearly activities.

Strategic Objective One: Ethical Governance

- Council will govern ethically, with consultation, integrity and transparency.

Strategic Objective Two: Wellbeing and Safety

- Council will create actively engaged, socially connected, and healthy communities.

Strategic Objective Three: Environmental Sustainability

- Council will create and shape healthy built and natural environments.

Strategic Objective Four: Thriving Community

- Council will drive innovation and future-focused growth to shape a resilient and adaptable city.

Strategic Objective Five: Connected Community

- Council will build a connected, vibrant city where neighbourhoods thrive.

2.1. FINANCIAL POLICY STATEMENTS

This section defines the policy statements, and associated measures, that demonstrates Council's financial sustainability to fund the aspirations of the Community Vision and the Council Plan.

Policy Statement	Measure	Target	Forecast Actual 2024/25	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31	2031/32	2032/33	2033/34	2034/35
1. Consistent underlying surplus results	Adjusted underlying result greater than $0	$0 $('000)	$9,133	$12,486	$12,193	$13,911	$12,000	$13,632	$15,211	$14,812	$15,340	$14,715	$15,988
2. Ensure Council maintains sufficient working capital to meet its debt obligations as they fall due.	Current Assets / Current Liabilities greater than 1.25	1.25	4.05	3.70	3.76	3.70	3.60	3.61	3.53	3.54	3.53	3.78	3.86
3. Allocate adequate funds towards renewal capital in order to replace assets and infrastructure as they reach the end of their service life.	Asset renewal and upgrade expenses / Depreciation above 100%	100%	268.09%	133.57%	164.12%	190.53%	157.59%	175.28%	173.39%	169.74%	168.46%	167.06%	170.36%
4. That Council applies loan funding to new capital and maintains total borrowings in line with rate income and growth of the municipality.	Total borrowings / Rate revenue to remain below 60%	60%	6.73%	5.75%	15.04%	12.95%	10.89%	8.87%	7.21%	5.57%	3.96%	2.36%	1.31%

Policy Statement	Measure	Target	Forecast Actual 2024/25	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31	2031/32	2032/33	2033/34	2034/35
5. Council maintains sufficient unrestricted cash (per LGPRF definition) to ensure ongoing liquidity as well as to address unforeseen cash imposts if required.	Unrestricted cash / current liabilities to be maintained above 15%	15%	140.57%	126.20%	138.22%	141.36%	137.35%	146.66%	141.01%	150.35%	153.60%	167.00%	175.48%
6. Indebtedness – General measure to use to ensure the level of long term liabilities are appropriate to the size and nature of Council activities	Non- current liabilities/ Own source revenue to be maintained below 40%	40%	7.01%	6.78%	12.97%	11.24%	10.70%	8.59%	6.71%	4.99%	3.54%	2.61%	1.73%
7. Rates and municipal charge dedicated to capital and asset improvements (excludes external grants, contributions, borrowings and reserves)	Capital and asset improvement 27.48 per cent of Rates and Municipal Charges	27.48%	27.48%	27.48%	27.48%	27.48%	27.48%	27.48%	27.48%	27.48%	27.48%	27.48%	27.48%

2.2. Strategic actions

The strategic actions are included to the financial plan and, where appropriate, referenced in the commentary associated with the Comprehensive Income Statement and the Statement of Capital Works.

Some of Council's key strategic actions include:

- Set rate increases in accordance with the Fair Go Rates framework and Revenue and Rating Plan.
- Identify efficiency gains in the operating budget to promote achievement of a financially sustainable operating surplus in a rate cap environment.
- Ensure service users make a reasonable contribution to the cost of services through appropriate fees and charges consistent with adopted pricing strategies and principles within the Revenue and Rating Plan.
- Seek alternative revenue streams and external funding opportunities to reduce over reliance on rate revenue.
- Apply a best value service/supply contract pricing approach to achieve quality and cost effective inputs to the delivery of Council services to the community.
- Increase investment in renewal capital to reduce the increasing risk and maintenance of aging infrastructure.
- Allocate additional funding towards addressing climate change.
- Apply new debt funding to growth infrastructure where necessary and based on a sound business case and demonstrated community benefit.
- Maintain current service levels for the next four years to enable Council sufficient time to complete a review of its service delivery programs.

2.3. Assumptions to the Financial Plan statements

This section presents information regarding the assumptions to the Comprehensive Income Statement for the 10 years from 2025/26 to 2034/35. The assumptions comprise the annual escalations / movement for each line item of the Comprehensive Income Statement.

The following table shows the description and annual escalations for each income and expenditure line item contained in the Comprehensive Income Statement for the 10-year period. Further information regarding the revenue sources is available in Revenue and Rating Plan. The annual escalations are based on research and information across various sources, mainly Australian Bureau of Statistics, Victorian Department of Treasury and Finance, State government budget, Forecast ID data, and general economic updates across the sector.

Rates and charges

The State Government introduced rate capping from 2016 as a part of the Fair Go Rates system, requiring all Local Councils to limit their annual the rate cap applies to general rate and municipal charges. It does not apply to waste charges or the State's fire services property levy. The rate cap for 2025/26 has been set at 3% as approved by Minister for Local Government, in comparison to 2.75% prescribed for 2024/25. Financial plan forecasts are based on Council complying with expected rate cap, annual rate increase for future years is aligned with expected future years Consumer Price Index (CPI) growth and wage price index. The actual rate cap is announced by the Minister for Local Government in December of the preceding year of the budget. In addition, it is expected that an additional $1.0m per annum will be driven by growth (additional properties) through receipt of supplementary rates. An increase of 1,200 dwellings every year is factored to reflect the expected growth and development across the municipality. Further information about rating principles can be found in Council's Revenue and Rating Plan.

Waste charges are based on the actual cost of delivering the waste service, the cost recovery principle.

Future years' waste charges are estimated to increase in line with the CPI % increase to ensure Council continues to recover the full costs of providing waste services.

Waste service charge includes expected tonnages of waste collected, landfill levy, general contract increase allowed for CPI and growth, also includes waste education and incentives as a part of future waste collection and disposal in the future. Residents may vary the waste service they receive and be charged according to the services they use and size of their bins.

Statutory fees and fines

The Financial Plan indexes statutory fees, set by legislation, according on the estimated annual rate of CPI. This is often a best case scenario given some fees are outside of the control by Council and therefore may be subject to increases less than CPI.

User fees

User fees and charges are those that Council will charge for the delivery of services and use of community infrastructure. The provision of infrastructure and services form a key part of Council's role in supporting the local community. In providing these, Council must consider a range of 'Best Value' principles including service cost and quality standards, value-for-money and community expectations and values. Council must also balance the affordability and accessibility of infrastructure and services with its financial capacity and in the interests of long-term financial sustainability. Councils must also comply with the Government's Competitive Neutrality Policy for significant business activities they provide and adjust their service prices to neutralise any competitive advantages when competing with the private sector.

In providing services to the community, Council must determine the extent of cost recovery for particular services consistent with the level of both individual and collective benefit that the services provide and in line with the community's expectations.

Services are provided on the basis of one of the following pricing methods:

a. Market Price

b. Full Cost Recovery Price

c. Subsidised Price

Revenue increase for user fees and charges for ten years is in line with CPI increase.

Grants

Council receives various grant funding and recognises the importance of actively pursuing grant funding to deliver significant projects and services to the community. Operating grants are expected to increase in line with CPI increase for future years.

Council only allows for confirmed capital grant funding in budget allocations. Capital grants are essential for Council to deliver projects that will have intergenerational benefits.

Contributions

Council receives contributions from developers. These contributions represent funds to enable Council to provide the necessary infrastructure and infrastructure improvements to accommodate development growth. The contributions are for specific purposes and often require Council to outlay funds for infrastructure works before receipt of this income source. These contributions are statutory contributions and are transferred to a restricted reserve until utilised for a specific purpose through the capital works program or delivered as works in kind by developers.

Contributions Plan

Council has in the past derived cash revenues from property developers in the form of open space contributions. These are based on 5.7% of the value of proposed developments. These are levied and collected through the planning process. In addition, there exists (under section 46I of the Planning and Environment Act 1987) the capacity for Council to consider city-wide and precinct-based development contributions plans for infrastructure.

The objective of such plans would be to partially recoup the costs of Council's community and development infrastructure associated with dwelling and/or floor space growth, which springs from new land developments (i.e. over and above the cost of open space) through the planning and building permit processes. This Financial Plan acknowledges that a city-wide Development Contributions Plan (DCP) for the City of Maribyrnong was developed in 2018/19 and 2019/20. The DCP has been incorporated into the Maribyrnong Planning Scheme, and the funds generated from this plan will be collected accordingly.

City-wide Development Contribution Plan

This Financial Plan also gives the City of Maribyrnong's longer-term community and development infrastructure commitments for a long term delivery horizon. These commitments will be periodically reviewed and reflect Council's intention to fund infrastructure projects and programs which are needed to support dwelling and/or floor space growth in the City. The list of committed longer-term projects is in Appendix A. These projects were considered for the city-wide DCP.

The Appendix A list has been prepared in-light of relevant legislation, ministerial directions and government guidelines for DCPs. The final list of projects for the city-wide DCP was included in the Council endorsed DCP.

Other Income

Revenue from other income, mainly comprises of recovery income from a variety of sources, including interest on investments and rental income received from the hire of Council buildings and facilities.

Employee Costs

Employee cost is one of the largest expenditure for Council to support the community and meet organisation commitments. Employee costs constitute a combination of direct wages and salaries, including on-costs such as superannuation, WorkCover, leave entitlements, training and temporary staff arrangements.

The 2025/26 year includes an assumption of 3% (2.5% EBA and the additional 0.5% superannuation guarantee) increase for the wages and salaries component of employee costs that mainly reflects salary increase, banding movement for all staff, the Enterprise Bargaining Agreement is under renegotiations in 2025/26 and staff resources for the Organisation is within current service levels with changes in demographics.

Additional growth in staff movement is assumed for 2026/27 to 2034/35 for delivery of Council services as the organisation's services continues to grow.

The 2025/26 increase in employee costs mainly reflects the:

- Impact of unfilled vacancies across Council in 2024/25. The budget for 2025/26 is based on the assumption every position will be filled throughout the year and Council will not have any savings derived from vacancies.
- Current Enterprise Bargaining Agreement (EBA) increase in 2024/25 had an increment of 3%. Please note new EBA negotiations will commence in 2025/26 financial year and this assumption may need to be revisited.
- Increase in the Superannuation Guarantee (SG) from 11.5% in 2024/25 to 12% in 2025/26. The new superannuation guarantee rules effective from July 2025 will increase the SG rate to 12% per annum.

Materials and Services

Materials costs include items required for the maintenance and repairs of Council buildings, roads, drains and footpaths which are governed by market forces based on availability than CPI. The cost of Council maintenance contracts for parks and gardens are expected to exceed CPI due to continuing growth in new Council assets, and the cost of raw materials like concrete, asphalt and other road base items which continue to exceed CPI. These external influences are driving the long-term forecasts for this budget cost item.

Council also utilises external expertise on a range of matters, including legal services and audit, and outsource large contracts such as waste management which on aggregate are expected to grow as our municipality grows.

This is due to increased tonnage and the anticipated increase in landfill levy, with the State government levy and increase contractual costs for landfill charges.

Other associated costs included under this category are utilities, materials, and consumable items for a range of services. Council also utilises external expertise on a range of matters, including insurance, legal and consulting services. These costs are kept to within CPI levels year on year.

Depreciation and amortisation

Depreciation estimates have been based on the projected capital spending contained within this Financial Plan. Depreciation is further increased by the indexation of the replacement cost of Council's fixed assets and Council's continued receipt of donated assets.

Borrowing costs

Borrowing costs comprise the interest expense to service Council's loan portfolio that is described in Section 5.1 Borrowing Strategy.

Other expenses

Other expenses include administration costs such as Councillor Allowances, election costs, court charges, lease expenditure, audit costs and other costs associated with the day to day running of Council.

2.4. Other matters impacting the 10-year financial projections

Council continues to face challenges, future events may impact the Financial Plan projections. Some of the main factors that may impact the 10-year financial projections are:

Lower rate environment

The overall financial impact of the lower rate environment has lead Council to review its services and capital works program and to source alternative funding.

Local Government Act 2020

The requirement for Asset Management Planning will be better informed by new deliberative community engagement. A possible re-defining of service demand and service levels in respect of community assets and infrastructure may increase asset maintenance and renewal expenditure.

Cost shifting

This occurs where Local Government provides a service to the community on behalf of the State or Federal Government. Over time the funds received by Local Governments do not increase in line with real cost increases. An example of this is Maternal & Child Health, where the level of payment received by Council from the State Government does not reflect the real cost of providing the service to the community. Council still plays a role in maintaining crown land reserves and has some exposure to infrastructure owned by other State authorities.

Public Infrastructure Maintenance

Councils are entrusted with the maintenance of public assets including roads, bridges, parks, footpaths and public buildings. This means that a large proportion of Council's income must be allocated to the maintenance and replacement of these valuable public assets in order to ensure the quality of public infrastructure is maintained at satisfactory levels.

What council is doing to address revenue constraints

- Council officers are continually looking at ways to operate more efficiently and finding costs savings.
- Council is investing in information technology to improve the efficiency of services to its growing community, which enables greater levels of productivity across Council staff and service providers.
- Council is also progressively reviewing all of its key services to ensure that the community is receiving value for money.
- Council regularly reviews its services in detail to ensure that it is operating efficiently and delivering the services required by the community.
- Council is constantly looking for additional grant funding from the Federal and State Governments to fund infrastructure.
- Council reviews its fees and charges to reduce the reliance on rates.

3. FINANCIAL PLAN STATEMENTS

This section presents information in regard to the following Financial Plan Statements for the 10 years from 2025/26 to 2034/35.

- Comprehensive Income Statement
- Balance Sheet
- Statement of Cash Flows
- Statement of Capital Works
- Statement of Human Resources
- Statement of Changes in Equity

3.1. Comprehensive income statement

Notes to Indicators

Adjusted underlying result
An indicator of the sustainable operating result required to enable Council to continue to provide core services and meet its objectives. Improvement in financial performance expected over the period, although continued losses means reliance on Council's cash reserves or increased debt to maintain services.

Working capital
The proportion of current liabilities represented by current assets. The trend in later years is to remain steady at an acceptable level.

Debt compared to rates
Trend indicates that borrowings are required to fund future city infrastructure projects.

Asset renewal and upgrade
This percentage indicates the extent of Council's renewals against its depreciation charge (an indication of the decline in value of its existing capital assets). A percentage greater than 100 indicates Council is maintaining its existing assets, while a percentage less than 100 means its assets are deteriorating faster than they are being renewed and future capital expenditure will be required to renew assets.

Rates concentration
Reflects extent of reliance on rate revenues to fund all of Council's on-going services. Trend indicates Council will become more reliant on rate revenue compared to all other revenue sources.

5. STRATEGIES AND PLANS

This section describes the strategies and plans that support the 10 year financial projections included to the Financial Plan.

5.1. Borrowing Strategy

Current Debt Position

Whilst not a source of income, borrowings can be an important cash management tool in appropriate circumstances. Loans can only be approved by Council resolution. The following financial sustainability principles must be adhered to with new borrowings:

- Borrowings must only be applied for where it can be proven that repayments can be met in the Financial Plan
- Borrowings must not be used to fund ongoing operations
- Borrowings are appropriate for funding large capital works where the benefits are provided to future generations.
- Council will maintain its debt at levels which are sustainable, with:
  - indebtedness <60% of rate and charges revenue, and
  - debt servicing cost <5% of total revenue (excluding capital revenue).

The 2025/2026 budget includes the existing borrowings, and the Council plans to take on new borrowings in the 2026/27 financial year for $15 million for the RecWest Shorten Reserve project. Currently, there are two loans one for $3 million, which began in June 2023, and another for $7 million, which started in April 2024.

The two loans totalled $10 million through the community infrastructure loan scheme (CILS) receive a discount of 1.5% for the loans, effectively reducing the Council's financial burden.

The following table sets out future Adopted borrowings, based on the forecast financial position of Council as at 30 June 2025. In developing the 4 years budget, borrowings was identified as an important funding source for capital works programs.

It is likely that in future years, borrowings will be required to fund future Capital projects.

The following table sets out future proposed borrowings, based on the forecast financial position of Council as at 30 June.

Year	New Borrowings $'000	Principal Paid $'000	Interest Paid $'000	Balance 30-Jun $'000
2025/2026	–	(990)	(319)	7,691
2026/2027	15,000	(1,921)	(838)	20,770
2027/2028	–	(2,319)	(932)	18,451
2028/2029	–	(2,435)	(827)	16,016
2029/2030	–	(2,555)	(717)	13,460
2030/2031	–	(2,178)	(609)	11,283
2031/2032	–	(2,289)	(504)	8,994
2032/2033	–	(2,406)	(393)	6,588
2033/2034	–	(2,530)	(277)	4,058
2034/2035	–	(1,747)	(172)	2,311

Borrowing Performance Indicators

The following table highlights Council's projected performance across a range of debt management performance indicators.

Prerformance Indicato	Target	Forecast/ Actual 2024 / 2025	2025 / 2026	2026 / 2027	2027 / 2028	2028 / 2029	2029 / 2030	2030 / 2031	2031 / 2032	2032 / 2033	2033 / 2034	2034 / 2035
Total borrowings / Rate revenue	Below 60%	7.75	6.73	5.75	15.04	12.95	10.89	3.15	4.03	3.15	2.31	1.50
Debt servicing / Rate revenue	Below 5%	0.40	1.01	0.98	2.00	2.28	2.22	0.80	0.82	0.80	0.78	0.76
Indebtedness / Own source revenue	Below 60%	7.68	7.01	6.78	12.97	11.24	10.70	3.89	4.13	3.89	3.10	2.34

Council maintains its loan borrowing within prudent and management limits as demonstrated by the following performance indicators.

Total Borrowings / Rate Revenue

Loans balance is well within the target level of 60% to meet Council targets over the ten year period.

Debt Servicing / Rate Revenue

Debt servicing (interest repayments) as a percentage of rates revenue should not exceed 5 per cent, ten year ratios are well within Council target and improving over the ten years.

Indebtedness / Own Source Revenue

Comparison of non-current liabilities (mainly comprising borrowings) to own-sourced revenue. The higher % identifies Council risk to cover non-current liabilities from the revenues the organisation generates itself. Own source revenue excludes grants and contributions. Council is within its 60% target over the life of the plan.

5.2. Reserves Strategy

Current Reserves

Non-Discretionary Reserves

Development Contributions
When people develop land for any use, they often contribute to or cause the need for new or upgraded infrastructure. Development contributions are payments or works-in-kind towards the provision of infrastructure made by the proponent of a new development. The development contributions plan outlines the levies landowners and developers must pay to the State Government and Council to fund infrastructure and facilities for the new community.

A development contributions plan (DCP) is a mechanism used to levy new development for contributions to planned infrastructure needed by the future community. Council collects development contribution levies from new development through an approved DCP.

An approved DCP is a DCP that forms part of a planning scheme. The Minister for Planning has to approve an amendment to the planning scheme in order to incorporate a DCP. The DCP assist's Council to fund a range of new vital local infrastructure that is associated with new development. Council also fund the balance of the cost.

The DCP is be used to fund essential infrastructure including:

- Roads
- Drainage
- Footpaths
- Streetscape works
- Childcare centres
- Maternal and Child Health Centres
- Neighbourhood houses.

City Wide Development Contribution Plan
This Financial Plan also gives the City of Maribyrnong's longer-term community and development infrastructure commitments for a longer term horizon. These commitments will be periodically reviewed and reflect Council's intention to fund infrastructure projects and programs which are needed to support dwelling and/or floor space growth in the City. The list of committed longer-term projects is in Appendix A. List the projects included in the City-wide DCP.

The Appendix A list has been prepared in-light of relevant legislation, ministerial directions and government guidelines for DCPs. The final list of projects for the City-wide DCP also comes from Council's annual budget commitments and Strategic Resource Plan, and are included in the Council endorsed DCP.

Restricted Reserves

Public Open Space
The Public Open Space is mainly concerned with the land that is managed by Council for community recreation and leisure, and includes parks for passive recreation, sports and active activities, linear trails, and more natural areas.

With the expected significant growth and change, it is essential that high quality open space is accessible not just for existing residents, but also for the many new residents who will be living in the Shire. To ensure that there are adequate parks and gardens for our community, Council has to plan for our future public open space needs and the ongoing enhancement of these treasured community assets.

Community Infrastructure Levies (CIL)
The Community Infrastructure Levy is a one-off payment set by the State Government under the requirements of the Planning and Environment Act 1987. It is a levy paid by property owners in residential developments/estates in growth areas. Council is responsible for delivering new facilities funded by the levy.

Each growth area precinct has different and unique infrastructure requirements. The Development Contributions Plan (DCP) sets out which CIL payments fund which infrastructure projects for that growth area. A CIL will pay for sporting pavilions, recreation facilities, and community facilities.

Discretionary Reserves

Major Projects and Other Reserves
Council has also set up some discretionary reserves for Major Projects, Plant Replacement Reserve, Mausoleum Trust, Carry Forward Reserve and a Defined Benefit Super Shortfall Reserve. This will allow the organisation to future proof itself and have resources available to support the community during a crisis.

Reserve Usage Projections

10 Year projection of each reserve fund. Include restrictions to usage

Reserves	Restricted / Discretionary	2024/25 $'000	2025/26 $'000	2026/27 $'000	2027/28 $'000	2028/29 $'000	2029/30 $'000	2030/31 $'000	2031/32 $'000	2032/33 $'000	2033/34 $'000	2034/35 $'000

5.3. Treasury Management Approach

Treasury Management

Treasury management involves the effective administration of Council's financial resources, focusing primarily on cash and other liquid assets. It encompasses both short-term cash flow management and, long-term investment and return strategies.

Our Approach

Financial Sustainability
We are committed to ensuring the long-term financial sustainability of Council operations by regularly monitoring and comparing performance against recommended Local Government financial indicators.

Resource Availability
We aim to provide sufficient resources to meet the current and future needs of our community. To achieve this, Council maintains adequate working capital to meet debt obligations as they fall due, ensuring the working capital ratio remains above 125%.

Inter-Generational Equity
Council considers the principles of inter-generational equity when planning capital expenditure. This principle ensures that the costs of long-lived assets are shared fairly across the generations that benefit from them. Borrowing is used as a key tool to spread these costs over the asset's useful life. A standard loan term of 10 years is adopted to balance the benefits of inter-generational equity with the costs of borrowing. Our borrowing strategy focuses on funding major projects only.

Investment Policy
Council regularly reviews, updates, and adopts its Investment Policy. The objective is to invest surplus funds prudently, balancing risk and securing the most favourable returns available for the investment type, while maintaining necessary liquidity. Investment returns are monitored and compared against the Annual Budget and quarterly financial reports.

5.4. Investment Strategy

Council's surplus funds are to be invested with careful consideration of risk, aiming to secure the most favourable interest rate available for the applicable investment type, while ensuring that liquidity requirements are met. Investments are limited to those identified by Section 103 of the Local Government Act 2020 and authorised investments as advised by the Minister for Local Government.

When exercising the authority to invest, the following priorities must be observed, in order of importance:

- Preservation of Capital: The primary objective is to safeguard the capital of the investment portfolio. Investments must be managed to protect the security of funds by controlling credit and interest rate risks within established thresholds and parameters.
- Liquidity: The investment portfolio must maintain sufficient liquidity to meet all reasonably anticipated cash flow needs as they arise, without the necessity of incurring costs through the premature sale of investments.
- Return on Investment: Investments are expected to achieve a prudent rate of return, consistent with Council's risk tolerance. Any additional return targets established by Council must align with the principles of risk limitation and prudent investment management.

Monitoring and Compliance
- The performance of investments will be regularly monitored and assessed against the Annual Budget and quarterly reports.
- All investment transactions must be authorised in accordance with Council's Instruments of Delegation.
- Comprehensive policies, procedures, and internal controls will be maintained to ensure effective implementation and monitoring of this Investment Policy.

6. APPENDIX A

6.1. DCP Projects

Location	DCP Project Name	Total DCP cost estimate
Kingsville	Kingsville Tennis Facility, West Footscray – new pavilion	**$1,216,000**
West Footscray	Church Street Early Years Facility, West Meadows – facility works	**$3,650,000**
Footscray	Footscray Park, Footscray – open space works	**$700,000**
Yarraville	Angliss Reserve, Yarraville – open space works	**$100,000**
Maidstone	Maribyrnong River Trail – Medway Link	**$600,000**
Footscray	Quarry Park, Footscray – open space works	**$3,894,000**
Footscray	Hopkins Street (under bridge), Footscray – new recreation space	**$400,000**
Footscray	Town Hall building, Footscray – new community facility	**$3,800,000**
Maribyrnong	Robert Barrett Reserve, Maribyrnong – sports field works	**$400,000**
Footscray	Footscray Hockey Facility – pavilion works	**$1,200,000**
Maidstone	Rogers Reserve, Maidstone – playground works	**$200,000**
Kingsville	Kingsville Early Years Facility, Kingsville – outdoor area works	**$100,000**
Footscray	Angliss Early Years Facility – outdoor area works	**$100,000**
Kingsville	Kingsville Tennis Facility, West Footscray – floodlight works	**$150,000**
Yarraville	McIvor Reserve (Hanks), Yarraville – floodlight works	**$150,000**
Maribyrnong	Burndap Reserve, Maribyrnong – open space works	**$150,000**
Footscray	Footscray Park, Footscray – irrigation works	**$507,000**
Maribyrnong	Jacks Wood Reserve, Maribyrnong – open space works	**$121,000**
Maribyrnong	Robert Barrett Reserve, Maribyrnong – open space works	**$157,300**
Maidstone	Rogers Reserve, Maidstone – irrigation works	**$193,100**
Yarraville	Yarraville Gardens, Yarraville – open space works	**$250,000**
Braybrook	Kinder Smith Reserve, Braybrook – cricket net works	**$150,000**
Maidstone	Scovell Reserve, Maidstone – cricket wicket works	**$110,000**
Braybrook	Skinner Reserve (Braybrook Park), Braybrook – cricket net works	**$150,000**
Yarraville	Hanmer Reserve, Yarraville – irrigation works	**$110,000**
Yarraville	Angliss Reserve, Yarraville – fence works	**$115,000**
Yarraville	Schild Street (Stephen to Hyde), Yarraville – road works	**$200,000**

Location	DCP Project Name	Total DCP cost estimate
West Footscray	Argyle Street (Barkly to Essex), West Footscray – road works	**$752,471**
Maidstone	Burns Street (44 Burns to Thomson), Maidstone – road works	**$234,471**
West Footscray	Rupert Street (Neil to Alberta), West Footscray – road works	**$280,000**
Seddon	William Street (Charles to Pilgrim), Seddon – road works	**$176,000**
Seddon	Pilgrim Street (John to Margaret), Seddon – road works	**$138,000**
Maidstone	Cambridge Street (Mitchell to Desmond), Maidstone – road works	**$560,471**
Braybrook	Hotham Street (Pritchard to Kent), Braybrook – road works	**$496,471**
West Footscray	Hex Street (Cala to Bizana), West Footscray – road works	**$389,471**
West Footscray	Fontein Street (Cala to Bizana), West Footscray – road works	**$395,471**
West Footscray	Hex Street (Bizana to Aliwal), West Footscray, road works	**$386,471**
West Footscray	Fontein Street (Bizana to Aliwal), West Footscray – road works	**$394,471**
Braybrook	Stewart Street (Turner to Pritchard), Braybrook – road works	**$388,471**
Braybrook	Turner Crescent (near Beachley), Braybrook – road works	**$224,471**
Braybrook	Churchill Place, Braybrook – road works	**$115,471**
Maribyrnong	Maribyrnong Aquatic Centre, Maribyrnong – facility works	**$300,000**
Yarraville	Angliss Reserve, Yarraville – floodlight works	**$240,000**
Footscray	Cowper Street (Harris to Lyons), Footscray – road works	**$3,534,000**
Yarraville	Cruickshank Park, Yarraville – open space works	**$201,000**
Footscray	Footscray Activity Centre, central Footscray – pedestrian priority works	**$160,000**
Footscray	Footscray Activity Centre, Barkly Street – streetscape works	**$100,000**
Footscray	Footscray Activity Centre, Bunbury Street – streetscape works	**$2,443,000**
Footscray	Footscray Activity Centre, Buckley Street – pedestrian priority works	**$609,000**
Footscray	Footscray Activity Centre, central Footscray – pedestrian priority works	**$420,000**
Footscray	Grimes Reserve, Footscray – open space works	**$600,000**
West Footscray	Hansen Reserve, West Footscray – pavilion works	**$4,190,000**
West Footscray	Hansen Reserve, West Footscray – open space works	**$1,300,000**

Location	DCP Project Name	Total DCP cost estimate
Seddon	Harris Reserve, Seddon – playground works	**$100,000**
Footscray	Henry Turner North Reserve, Footscray – pavilion works	**$154,000**
Footscray	Henry Turner South Reserve, Footscray – new pavilion	**$884,000**
Braybrook	Kinder Smith Reserve, Braybrook – floodlight works	**$124,000**
Seddon	Mappin Reserve, Seddon – playground works	**$100,000**
Yarraville	Norfolk Street Early Years Facility, Braybrook – facility works	**$1,950,000**
Braybrook	Pennell Reserve, Braybrook – open space works	**$908,000**
Braybrook	Pennell Reserve, Braybrook – pavilion works	**$2,600,000**
Maidstone	Scovell Reserve, Maidstone – new pavilion	**$2,850,000**
West Footscray	Stony Creek (near Cala Street), West Footscray – new bridge	**$320,000**
West Footscray	Stony Creek (Waratah to Roberts), West Footscray – new path	**$275,000**
Footscray	Maribyrnong River, Footscray – river edge works	**$6,000,000**
Multiple Locations	Bicycle and Pedestrian – municipal network works program	**$11,000,000**
Maribyrnong	Maribyrnong River Trail, Burndap Lake – path works	**$425,000**
Footscray	Maribyrnong River Trail, Footscray Park – path works	**$365,000**
Footscray + Maribyrnong	Maribyrnong River Trail – lighting works	**$750,000**
